

# Technology Cabling

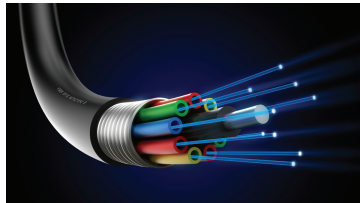

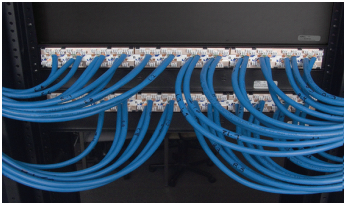

Cabco is Atlantic Canada's most trusted resource for structured cabling installation and service since 1980.

From a single office to large data centers, Cabco's skilled technicians take pride in offering reliable service and quality workmanship...*from pole top to desktop.*

## Quality and reliability - on schedule and on budget!

Since 1980, Cabco has built the communications cabling backbone for thousands of businesses across Atlantic Canada using the best products and adhering to the strictest standards for quality and regulatory compliance.

Cabco will install, terminate, ground, bond, label and test your communications cabling to ensure optimum performance of systems and devices on your network. You can depend on our experienced structured cabling team to do the job right - *on schedule and on budget.*

Our technicians have manufacturer and industry-specific certifications including Communications Cabling Specialist (CCS) designations. As the oldest independent communications integrator in Atlantic Canada, we are proud of Cabco's reputation for quality work, expertise and adherence to the highest levels of professionalism and job safety in the industry.

### Technology Cabling services include:

- Cat5e, Cat6, Cat6A (FT4, FT6)
- Coaxial cabling
- Inside, outside and multi-site service
- Infrastructure testing, verification and certification
- Fibre optic cabling and splicing (single and multi-mode)
- Gigabit backbone cabling
- Audio visual, CCTV, security and specialty cabling
