

Video Collaboration

Audio Visual Integration

Enhance collaboration via cloud hosted and room-based video conferencing solutions. CABCO also offers Audio Visual products and services to further optimize your meeting space investment.

Harness the *savings* and *productivity boost* that virtual collaboration affords.

Face-to-face Meetings - anywhere, anytime

Room-based and cloud hosted video conferencing solutions help you securely and cost-effectively collaborate with your staff, partners and customers.

Reduce Costs: eliminate travel costs, leverage existing devices, save time

Reliable: secure, standards-based technology for quality video with clear audio

Practical: easy to use with built-in firewall traversal to ensure fast connectivity

Accessible: communicate with any brand of video conferencing system, mobile device, tablet, laptop or telephone with no cumbersome software or licensing

Responsible: less travel helps reduce emissions and your carbon footprint

Room-based Conferencing *and* Audio Visual Integration

High definition camera systems provide a secure, quality conferencing experience for medium to large meeting rooms. Available dual 1080p/60fps video channels, H.264 high profile for bandwidth efficiency and error resiliency, mobile device control, etc.

CABCO will help you integrate these systems with suitable displays or projectors, sound systems, controls, document cameras and more to optimize and simplify user experience in any meeting space.

Cloud conferencing rooms enable user access from any device with unlimited usage.

Hosted Virtual Conferencing Rooms

Secure, standards-based conferencing accessible from any device, anywhere.

- Access via laptop, tablet, smartphone, video conferencing system or telephone
- Annual subscription per virtual room
- No hardware required, no hidden fees
- 25 concurrent participants with unlimited usage
- Share desktop content, annotate, live chat, lecture mode and more
