

WiFi and Networking

Wireless LAN, Ethernet Routing Switches

WiFi that offers an exceptional user experience, while reducing threats and costs via cloud management.

CABCO offers a range of WiFi Access Points, Managed Wireless and Ethernet Routing Switches designed to optimize network performance and permit the best possible user experience.

Application-first Wireless for Business

Application control: prioritize business-critical over best effort applications for optimal wireless performance and network security

Integrated controller: reduces equipment, simplifies deployment while ensuring no single point of failure or performance bottlenecks

More bandwidth: 802.11ac speed optimization leverages dual 5GHz radios to maximize bandwidth on newer devices, 2.4GHz radios to optimize legacy devices

Managed WiFi: cloud management permits simplified monitoring, application control and administration across your entire WiFi network

Security: 24x7 channel scanning and WiFi attack monitoring to mitigate risks

BYOD and guest access: automated guest access, unified onboarding process to easily add new devices and manage user and application restrictions

Flexibility: from indoor wireless networks supporting thousands of devices to outdoor long distance point-to-point broadband solutions

Seamless Integration: from pole top to desktop, CABCO can integrate your wired and wireless network with the technology you use everyday

Improve network performance, reduce failover time and prevent outages due to human error.

Ethernet Routing Switches

An optimized network ensures technology and applications operate the way they are intended.

From small business to data centers, CABCO offers a range of reliable, high performance ethernet routing switches:

- Fast Ethernet and Gigabit Ethernet switches available in 10, 24 and 48 port models
- Resilient stacking for scalable growth up to 80 GB of capacity
- Fanless models available for silent operation in open areas
- Plug-and-play capabilities, automatic QoS provisioning and intuitive management
- Energy efficient switch options delivering over 80% efficiency
- Available Lifetime Hardware and Software Warranty
